Kai Hannemann (Germany), kai.hannemann@gmail.com

Phil Wade (Australia), phil@ThreatVectorX.com

Carlos Amorim (Portugal), carlosamorim@externatoliveiramartins.com

These are the official rules for RoboCupJunior 2015. They are released by the RoboCupJunior Rescue Technical Committee. These rules have priority over any translations. **Changes from the 2014 rules are highlighted in red.**

7. SuperTeam Challenge

7.1 SuperTeams

7.1.1 All teams have to participate in the SuperTeam Tournament. Teams will form SuperTeam alliances by drawing a lottery or other fair matching methods.

7.1.2 Teams will have sufficient time to start planning among alliance teams throughout the first three days of the individual team competition.

7.1.3 Success in the SuperTeam game takes collaboration without border. Teams should be prepared to form an alliance which will create the most awesome solution for a greater challenge.

7.2 Robot

7.2.1 Teams can use a different robot from the one they used in the individual tournament, **but both robots needs to be from different teams.**

7.2.2 If inter-robots communication is desired, teams are allowed to use Bluetooth Class 2, 3 or ZigBee communication.

7.2.3 Also Refer to Rescue Line 2015 Rules in Section "2. Robots".

7.3 Mission

7.3.1 SuperTeam missions will be revealed at the international event.

7.3.2 Teams should come prepared to perform some program and/or electronic modifications that the alliance teams may need.

7.3.3 The field conditions may be different from the individual competition.
